

# SKY MOD MODULAR TERMINALS

**TIMELINE FOR DELIVERY:**  
4-16 weeks from IFC

**APPLICABLE PRODUCTS:**  
Crude Oils, NGL, LPG, Butane,  
Refined Fuels, Biodiesel

**MORE INFO?**  
[sales@skyeye.ca](mailto:sales@skyeye.ca)

## THE DETAILS

Sky Eye's Modular Terminals are suitable for various commodities, including crude, NGL, LPG, Butane, refined fuels, and biodiesel.

Our extensive experience with truck and rail terminals across North America enables us to understand our end-users' specific technical needs and design accordingly. We leverage modular, prefab designs called SKY-MOD'S™

SKY-MODS are pre-built in our shop, disassembled, then sent to site and reassembled to achieve a functional, modular solution. We can deliver these projects in as little as six weeks from IFC delivery and round out our Modular Terminal projects with on-site field commissioning and startup assistance.

## DELIVERABLES + TECHNICAL SPECS

- Air elimination and strainer
- Centrifugal or sliding vane pump
- Automated flow control and flow control valve
- Watercut, pressure and temperature measurement
- Coriolis or PD meter measurement
- VFD controlled motor
- Overpressure relief and blowdown tank
- Retractable 25' mast lighting
- Full gas, fire, and H2S detection options
- Additive injection system
- Scully grounding and overfill protection
- All Piping built to ASME B-31.3
- Full QC turnover package
- Fully customizable packages depending on your specific needs
- On-site commissioning
- Optional on-site training
- Optional Terminal Gantry system with various number of rail spots and load arms
- Fully designed and engineered in house by our team of certified designers and Professional Engineers
