THE DETAILS

Sky Eye's Truck Offload/Loading Packages (TOL) are designed for custody transfer truck offloading and loading crude oils and condensates.

Our TOL's are highly customizable with a custom piping design and layout and the paint scheme of your choice. We prioritize fast turnaround with these cost-effective units and can have your order on-site in as little as four weeks from IFC. Each of our TOL's is built to exceed Canadian standards and has decades of upstream experience translated behind its efficient, reliable design.
